Mean transaction value

3.75

Avg Rating

Customer satisfaction score

Key Features Tracked

- Customer demographics & location
- Purchase details & preferences
- Shopping behavior patterns
- Subscription & loyalty metrics

Data Preparation Journey

01

Data Loading

Imported dataset using pandas for analysis

02

Exploration

Summary statistics and structure validation

03

Cleaning

Imputed 37 missing review ratings by category median

04

Feature Engineering

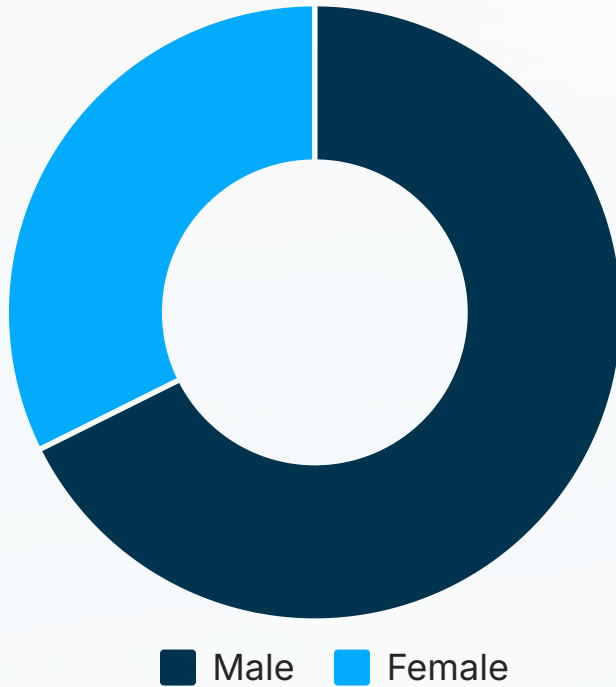

Created age groups and purchase frequency metrics

05

Database Integration

Loaded cleaned data into PostgreSQL for SQL analysis

Revenue Insights by Gender

Key Finding

Male customers generate **2.1x more revenue** than female customers

Total revenue: \$233,081

Top Performing Products

1

Gloves

Highest rated: **3.86** average rating

2

Sandals

Strong performer: **3.84** average rating

3

Boots

Customer favorite: **3.82** average rating

4

Hat

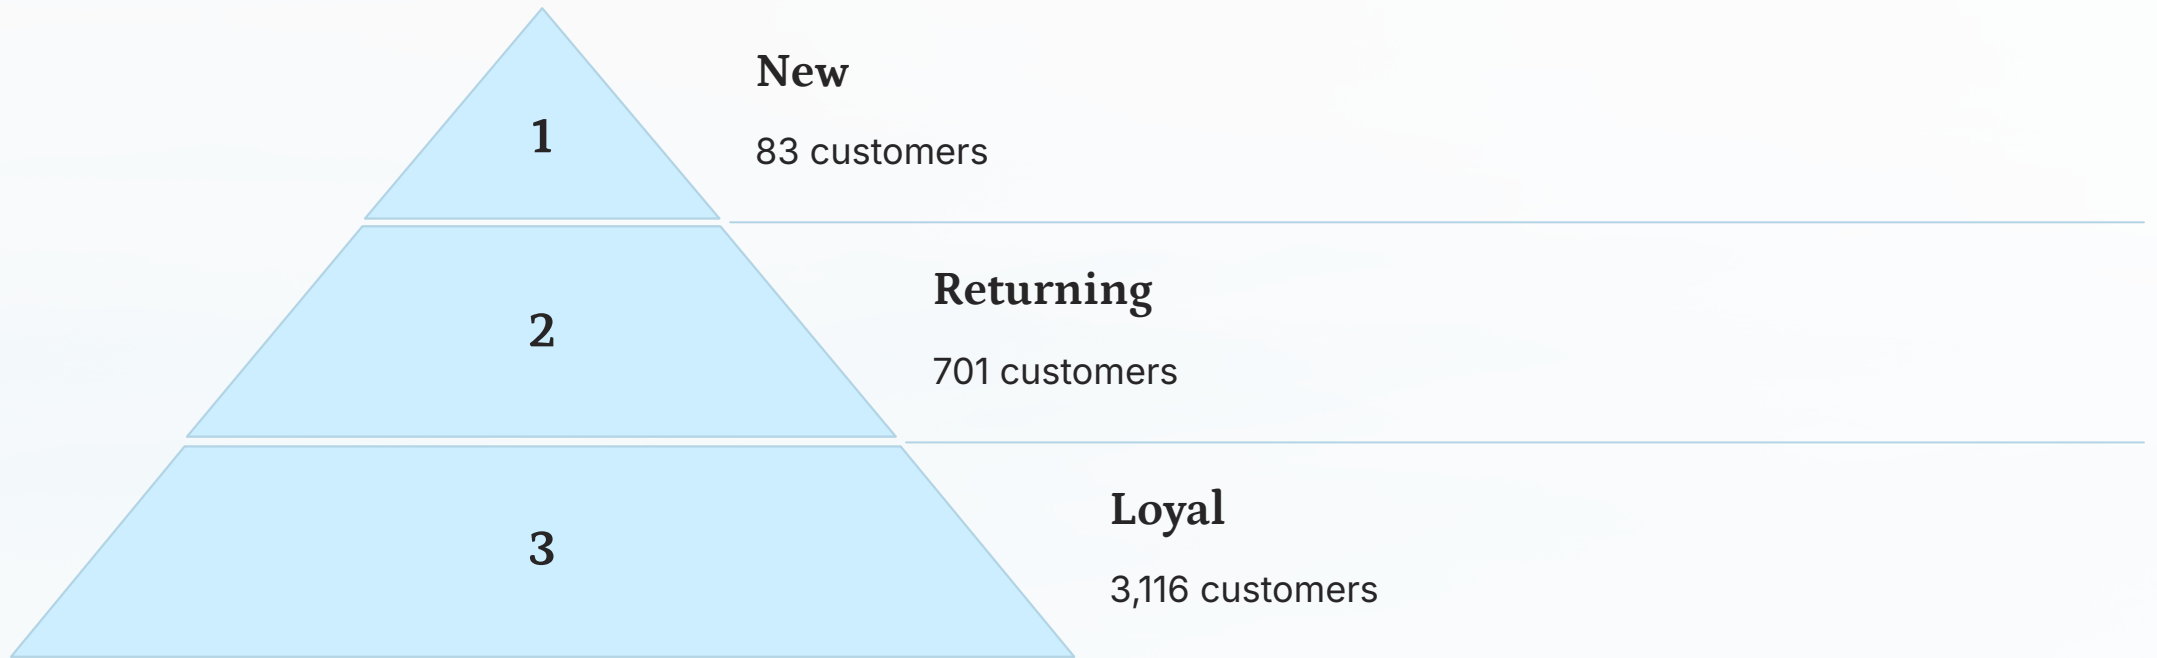

Popular choice: **3.80** average rating

5

Skirt

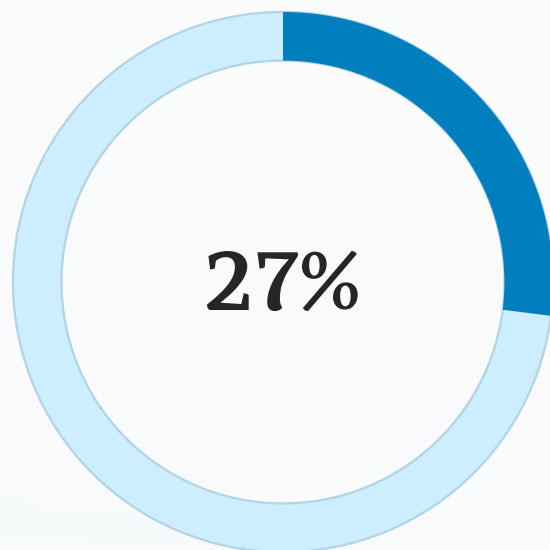

Top 5 rated: **3.78** average rating

Customer Segmentation Analysis

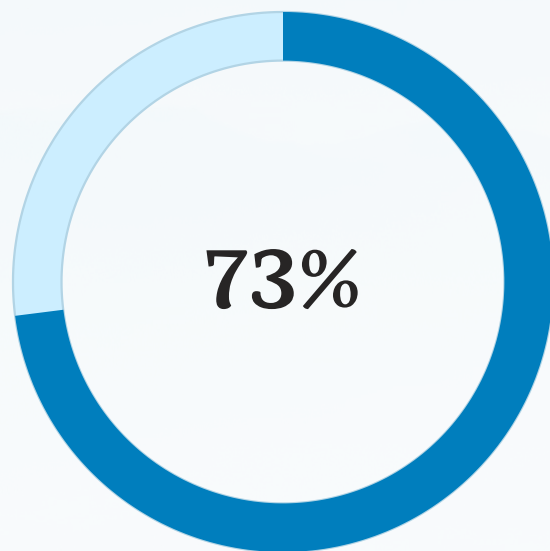

80% of customers are in the Loyal segment, showing strong retention

Subscription Impact

Subscribers

1,053 customers

Non-Subscribers

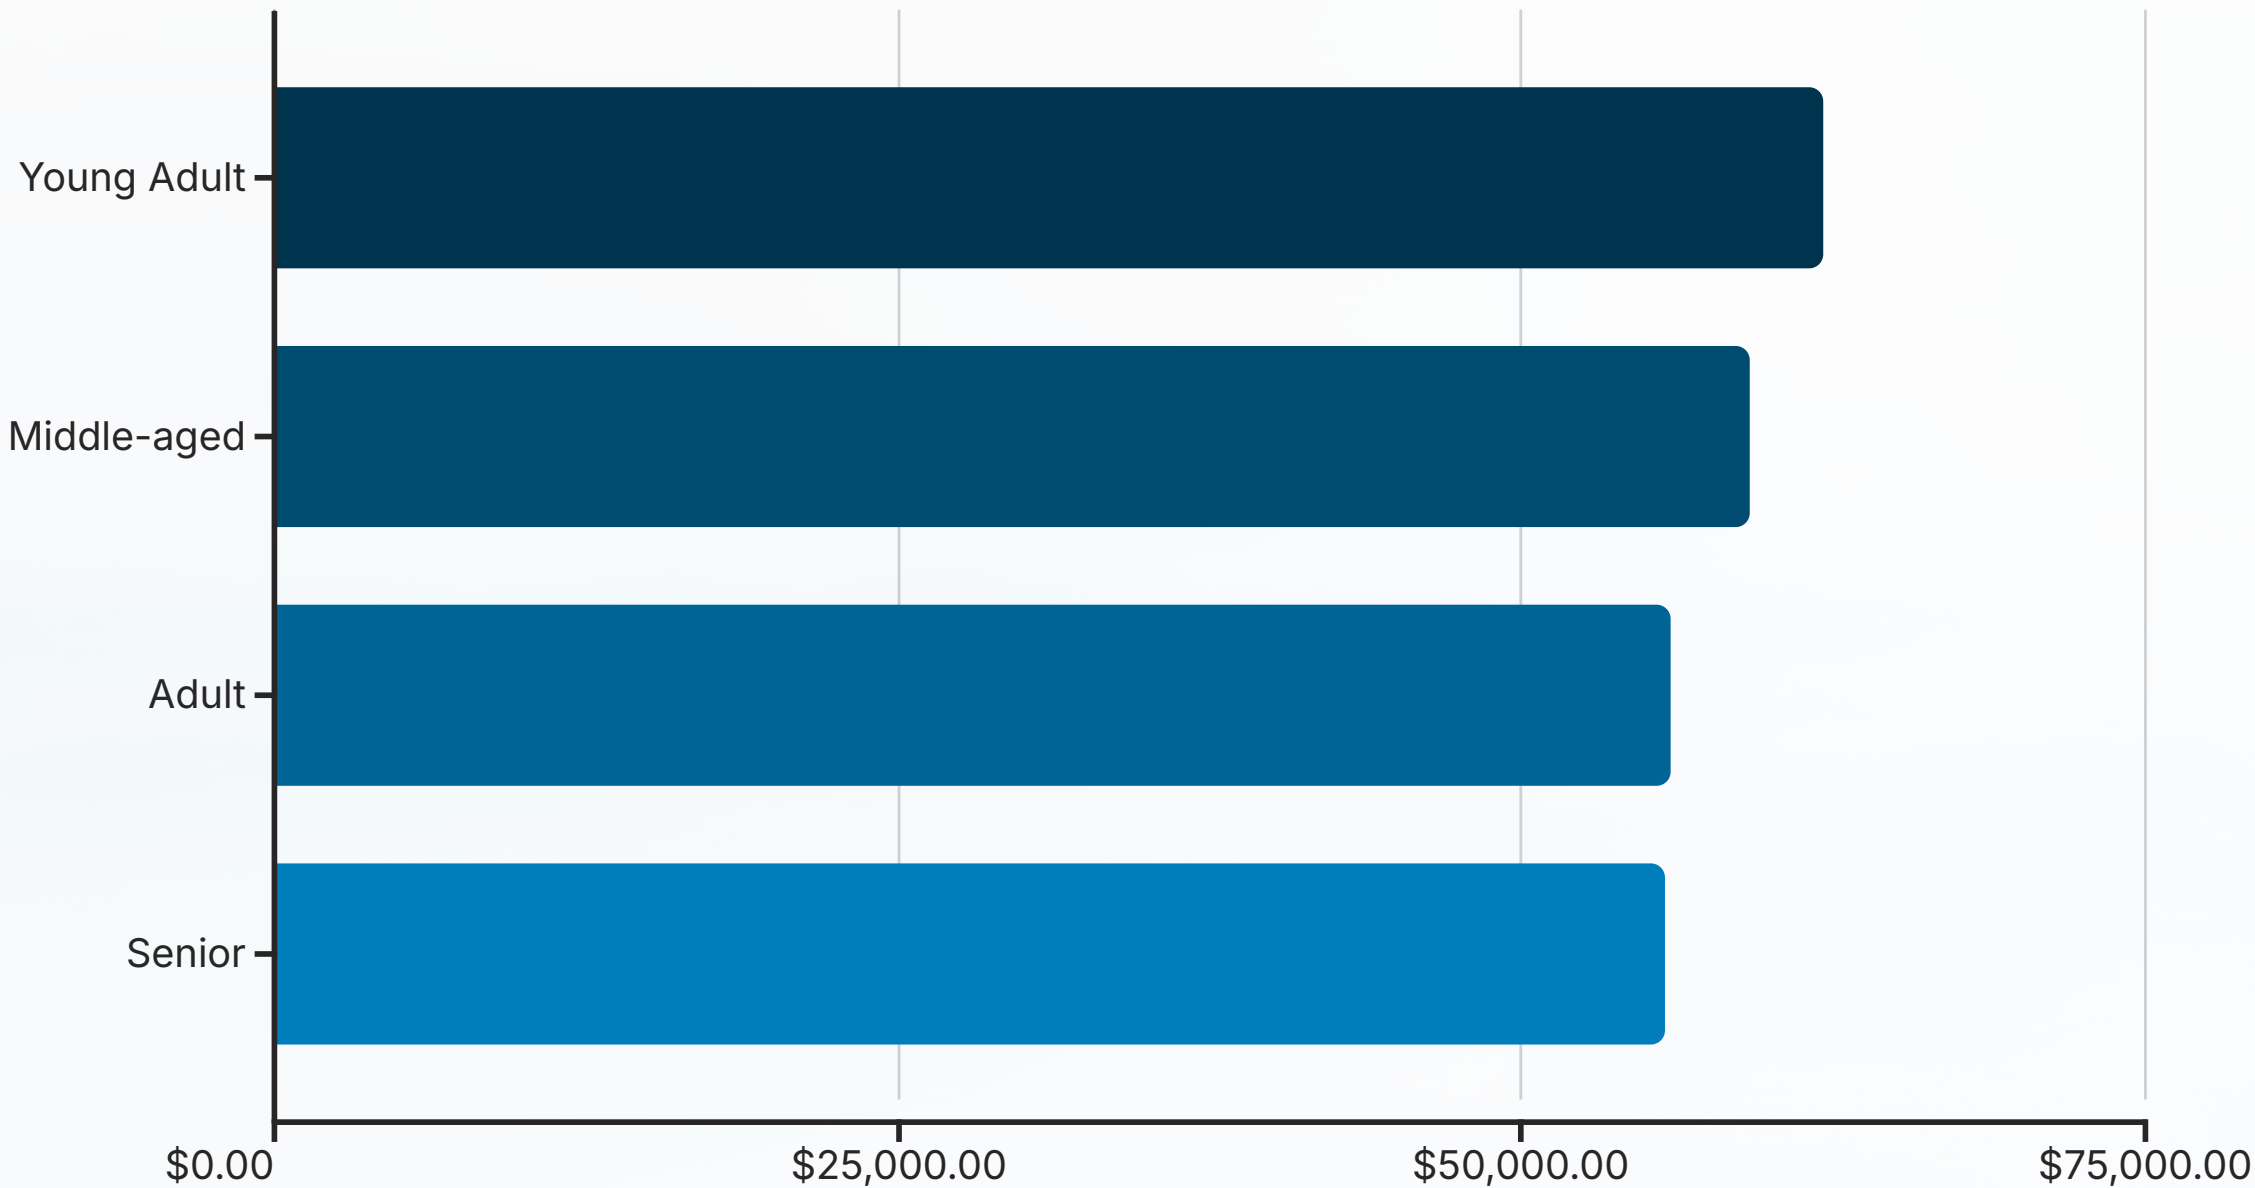

2,847 customers
